GROWING BIGGER!!

THIS year will witness our biggest expansion plan so far for Respack Manufacturing. The acquisition of Lot 87 and 89 just next to our existing plant Lot 85 will see a larger space being occupied and more excitement will be coming in too! There will be a more spacious working area, fully-equipped laboratory for R&D, more machines, bigger warehouse and even a larger gym for employees to have their workouts.

Along with the expansion, we will also have a brand new 8-colour printing machine, wicketed machines and more extruders too. Renovations are expected to be completed by November 2017. So do come and visit us soon to see the excitement!

Celebrating Malaysia's Enterprising Spirit!

Congratulations Respack for becoming one of the top 50 companies shortlisted for the Malaysia E50 Award! We are so proud of our team!

Enterprise 50 (E50) is an annual award programme organized by the SME Corp and Deloitte Malaysia, with supporting sponsorship by RHB Bank and Telekom Malaysia (TM) to celebrate and highlight the achievements of enterprising companies that are well positioned for the future. Winners are selected based on their financial capabilities, operations and management competencies.

Each year, 50 winners are selected from amongst the nominations received and the evaluation is based on key financial and non-financial factors.

For Respack, we are both honored and pleased to win this award especially when Respack is such a young company. The win reinforces our confidence

that indeed, the company is going towards the right direction and doing the right thing at the right time.

“Taking part in this award has not only helped Respack to gain recognition, it has also enabled us to review, recap and strategize our future growth in a way that we could capitalize on the benefits of the award and by working closely with all the sponsors and organizers. Winning this prestigious award will also motivate all our team members to strive harder towards a higher growth,” Managing Director Mr Wan says.

We hope to continue to provide better quality products and services in appreciation to all our customers, shareholders and business associates who have supported us thus far.

Thank you for your endless support!

Breakthrough Moments: Respack Manufacturing rated 4 Stars!

As a young, vibrant and dynamic company, Respack is proud to be rated 4 Stars for the SME Competitiveness Rating for Enhancement (SCORE). SCORE is a diagnostic tool which assign stars rating to indicate the performance level of SMEs based on seven assessment criteria such as Financial Capability, Business Performance, Innovation, Management Capability, Marketing Capability, Operation Management and Talent Development.

This is a great achievement for Respack and we will not rest on our laurels! We will be moving up to 5 Stars next!

Congratulations! It's A Girl!

We extend our warm congratulations to Donna and Matthew Allen on the birth of their first child.

The delightful Elizabeth was born on Sunday 30th July at 13.47pm weighing in at 4.3kg.

Matthew, Donna and Elizabeth, we wish you all a very wonderful time getting to know each other, we hope that family life together is fun, filled with laughter and more sleep than you're expecting!

WELCOMING OUR NEW TEAM MEMBER EMILE

Hi, I'm Emile, Business Development Manager at Respack.

I'm 36 years old, born and raised in Alsace, eastern province of France. Married, a child on the way. I can speak French, English, German, Spanish and a bit of Mandarin. I like surf, sailing, science-fiction & modern art. At 33 years old, eager to face new challenges after a successful experience in the medical eyewear industry in France, I relocated to Asia. I have been trained for one year in my first B2B environment, discovering China as an intern in a French wines import business.

When I felt my training in logistics was complete, I came back to my first love, and worked in Dongguan, China, doing business development with a manufacturer of black masterbatches.

I lived in 24/7 Chinese factory life for 2 years.

I have attended the profession's biggest trade shows in the world and caught the Plastic virus. Fascinated by the complexity and dynamism of this industry, the variety of raw materials, converting methods and applications, I know I want to pursue a career in this industry, where I can learn new things every day.

Mr Wan, I met him during a few exhibitions these past years and I found we had many values & vision about business in common. When he invited me to join Respack's adventure in Malaysia, my wife and I took this opportunity to live in this beautiful country in the centre of South East Asia, where food is excellent and the weather warm all year long.

I am delighted to work with a group of so kind, motivated and competent colleagues. With all the exciting projects boiling here at Respack, I know that many adventures are in front of us, but our team is solid and united enough to overcome all the future challenges.

SUCCESS BEGINS WITH HARD WORK HAPPINESS BEGINS WITH GOOD HEALTH

“All work and no play make Jack a dull boy!”

Author Dave Hemsath goes to say fun is one of the most important traits for a highly effective and successful organization. In fact, companies that adopt a fun oriented culture have lower absenteeism, greater job satisfaction, less down time and plus increase in their employees loyalty.

At Respack, we always strive to create an atmosphere where everyone can feel comfortable thus being able to be more productive while working at their work space. Some of the fun activities which we have organized are our weekly badminton and gym sessions, and our fun HIIT dance classes. These activities are aimed to enable employees to relax and enjoy after a full week of work.

Our latest sports gathering was on the 23rd of September, the Malaysia Day marathon where a group of us have taken on the 6km and 12km run respectively. This was our 2nd participation in a marathon after the fun-filled first event which was the Chocolate Run held in March, 2017. Here are some of our photo collections during the Marathon Run!

CHOOSING THE BEST CAST STRETCH FILM

In our first edition of this newsletter, we would like to share some opinion on stretch film. A lot of users could not decide on which type of stretch film grade as their preference. When it comes to choosing the best, there are some criteria that should be considered. As a cast film manufacturer, we always try our best to educate our customers on which cast film should be at the top of their list according to their preference. Choosing the right film will help you to use less energy at lower cost. So, here are some tips that may help you to make the choice. Good cast wrap will have:

- ✓ High tensile strength,
- ✓ High puncture resistance,
- ✓ Percentage of stretch ability
- ✓ High gloss and clarity
- ✓ Holding / retention power
- ✓ Greater value of money

In Respack, we have several grades representing different quality for hand and machine applications.

As there are different grades representing different application of cast film, make sure you choose the best to meet the needs of your products. Do not hesitate to ask us for more information and it is our pleasure to answer them for you. Choose the best for your future!
