MEET ASIA'S FIRST VENTILATED STRETCH FILM

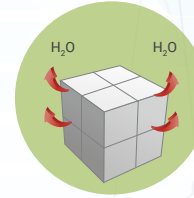

Airmax™ is our patented and copyrighted best ventilated system in Asia in terms of performance and cost. It is perfect for transporting products likely to get damaged by ripening gases, humidity, rust, mold or condensation, as well as products that need to chill or to freeze quickly. Used like a conventional stretch wrap, its vent holes allow air to circulate while the fibre reinforced structure offers high load containment.

Respack has developed AIRMAX™ using innovative and proprietary processes to provide the following benefits:

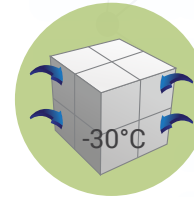

- Improve plant efficiency
- Reduces palletizing costs
- Offers maximum aeration
- Excellent load stabilization
- Film has tack, allowing easy finish to the wrap
- Available in manual or machine grades
- Pre-stretched: convenient to apply

**PROVIDE AERATION
FRESH PRODUCE**
Vegetables, fruit, flowers, plants, eggs, cheese, etc.

**AVOID CONDENSATION
HOT-FILL PRODUCTS**
Carbonated drinks soft drinks, breweries & cooked foods caterer, canned food, etc.

**FAST COOLING
CHILLED & DEEP-FROZEN PRODUCTS**
Dairy products, ice cream, meat, fish, frozen food etc.

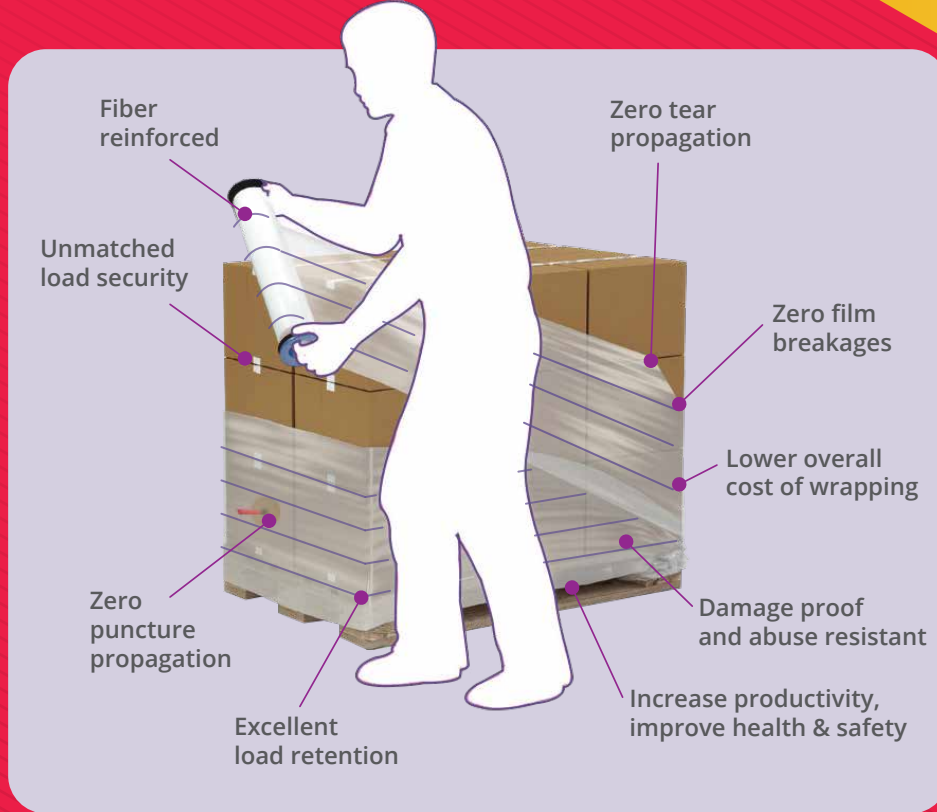

The key features of Airmax™ in comparison with the other products are shown as below:

Other products	Airmax™
Europe & US	1st in Asia Pacific
Hole is formed with punching & tools	Hole is formed with Air Vacuum system
Frequents tools maintenance	Zero maintenance
Low productivity	High speed production
Available in 30um to 60um	Available with reinforcement 5um to 15um
Very low load retention force	Very high load retention force, reduces wrapping revolution
Easy tearing	Zero breakage guaranteed
Low stretch level <50%	Available up to 300% pre-stretch
High wrapping cost – High \$/meter	Very low wrapping cost – low \$/meter

- Lowest cost per pallet -
- Superior pallet stability -

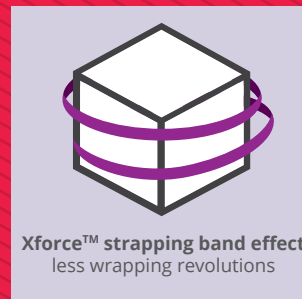

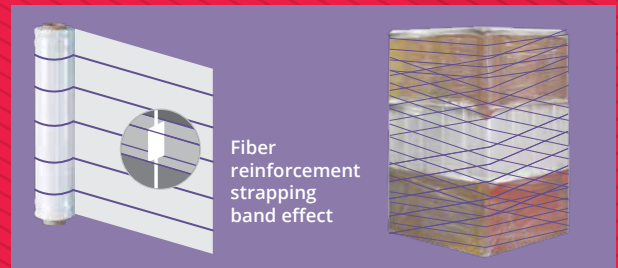

Meet our **X-FORCE™**
our fibre-reinforced stretch film!

Xforce™ is a high-efficiency stretch film for ideal load security at the lowest possible cost. Its reinforcement strips offer a **STRAPPING BAND EFFECT**, blocking any tear propagation, for a better protection of your packages during transit. Because the base film is extra-thin and the reinforcement strips do all the heavy work, Xforce™ delivers a higher strength with less material for unrivalled cost-savings and exceptional load holding characteristics.

Features:

- Fiber-reinforced pre-stretched film
- Ultra-thin gauge
- Excellent load holding
- No tear or puncture propagation
- Damage-proof edges
- Lightweight roll
- 100% recyclable

The available grades which we offer are:

Xforce™	Features	Film Width	Film Length	Film Weight	Core ID	Core Width
Hand Wrap	pre-stretched, 5 reinforcing stripes, oscillation	450 mm	500 m	1.75 kg	2" or 3"	485 mm
Machine Wrap (Core Break)	pre-stretch <150%, 5 reinforcing stripes, oscillation	450 mm	1320 m	6 kg	3"	485 mm
Machine Wrap (PPS)	pre-stretch <300%, 5 reinforcing stripes, oscillation	450 mm	1180 m	6 kg	3"	485 mm

CHINAPLAS 2018

Respack and our Chinese partners DWJ Masterbatches joint forces at the Chinaplas exhibition this year, establishing a bigger market presence in the evergrowing Chinese market.

Chinaplas, already the world's largest plastics trade fair, got 30% bigger this year with its move to a new exhibition center in Shanghai. The show, which opened April 24 and ran through April 27, this year moved to the city's new National Exhibition Convention Center, the largest single block exhibition center in the world. With over 4000 exhibitors, the fair saw participants from around the world together with 11 country/region pavilions.

PACKINNO 2018

Guangzhou, China

We are excited about the reception given this year by the Chinese packaging professionals to the colleagues of our new Dongguan branch.

Once more, the Land of Opportunities has brought Respack many new friends and exciting business openings.

Successful installation of Syncro Automation System

24th April 2018 marks another successful installation of a new system for Respack Polychem, our masterbatch and compounding division with the installation of the Syncro Automation System on our masterbatches twin screw machine.

What is the Syncro Automation System?

It is a new and an advance technology from Italy that fully automatically controls the whole machinery operations from the beginning till the end by using the programmable logic controller (PLC) programming.

What are the advantages of the system?

The system reduces operational time as the mixing process is no longer done manually. The materials are taken up to the hopper by a suction pipe and the mixing process is controlled by the control panel based on the formula set up at the beginning of the process. This system is able to give an output as high as 300kg to 800kg per hour. It also ensures that the materials are well mixed to produce good quality masterbatches with tolerance ranging between $\pm 1\%$.

What are the advantages of the system to Respack and customers?

The quality of masterbatches directly impacts the quality of the products. Good quality masterbatches ensures good colour quality and add better shine to the products. It is important to use good quality masterbatches so that there is no chance of inducing any quality defect in the plastic due to masterbatches.

Celebrating Milestones

7.7.7

Celebrating our 7th Anniversary and the official opening of a new factory... upcoming soon!

An ultra-modern office with a spacious cafeteria and relaxing area, a new gymnasium, plenty of artsy and creative workspace...Respack's new office is indeed someplace we would prefer to work in and to work with!

We are excited to announce that we have moved into our new office located just next door to the existing one, with our Customer Service, Accounts, Human Resources, Purchasing and Business Development departments all getting new workstations. And whats more, this coming July, Respack's new office building and factory will be ceremoniously officiated by our Chief Minister of Kedah state, YAB Dato' Seri Mukhriz Mahathir. It is our honour and privilege to have the Chief Minister to officiate the opening. In conjunction with the event, Respack is also celebrating our 7th Anniversary since our inception in 2011. Yes, we have come a long way, charting many milestones and it is time to put on some party hats!!

Indeed, we look forward to this upcoming event soon. Preparations are busy on the way, and do look out for the latest news in our next newsletter to be published in October!

22.3.2018

RESPACK ExxonMobil

2nd Joint Technical Conference

Respack was again privileged to jointly organize a 2nd technical conference with ExxonMobil Chemical on the 22nd of March 2018 this year after our first successful seminar back in 2016. Attended by key customers from Australia, New Zealand, Japan and China, it was a knowledge-sharing event, where we had speakers from ExxonMobil sharing on their tailored solutions in stretch film, with introduction of their special grades such as Vistamaxx™ and Enable™.

The conference also saw Massimo Zecca from Colines who shared his expertise on the latest technology in stretch wrapping machine. Respack's Managing Director Mr CK Wan also launched the company's new products - the AirMax™; Asia's first ventilated stretch film, and XForce™; a unique, high efficiency stretch film with reinforcement strips.

Delegates of the conference also took a tour of our stretch film manufacturing plant in Gurun, where they had hands-on experience in the demonstration of our new products.

We would like to thank our partners, ExxonMobil and Colines for their joint effort, and mostly, deepest gratitude and appreciation to our customers who had travelled afar to join us for this conference. We trust that the event has been beneficial and we look forward to our 3rd conference soon!

Official Launch of Respack Fitness Club

The health and well-being of our employees are of utmost importance to us in Respack. We cannot emphasize enough of the importance of being healthy - physically, emotionally, mentally and spiritually even while at work. In an effort to build this awareness among all employees, for the first time ever, Respack has launched our very own Fitness Club in April 2018.

It was a fun-filled day with a Zumba dance session, a health talk and complimentary health checks for all employees by a leading pharmacist and dietitian. The crowd also took the opportunity to celebrate our Managing Director's birthday on that day, with a special birthday cake followed by sumptuous pot-luck lunch.

Among the regular workout sessions to be organised by Respack Fitness Club are:

- **Zumba Class**
every Thursday 5.45pm to 6.45pm at Lot 46 factory
- **Gym class**
every Tuesday and Thursday at 5.30pm to 6.30pm at Lot 85 factory

Join us today! Get fit, for life.

Effective Business Writing Training

Effective business writing skills are essential for effective communication. On the 4th of May 2018, Respack has organised a full-day business writing workshop which saw 25 personnel from various departments being coached by professional trainer Ms Zetti Radzi. Participants gained insights into various topics such as on e-mail ground rules, selling with words and communicating in a simple and concise method.

Joining our efforts for the society

Corporate social responsibility is one of the key areas of which Respack will be focusing more on this year. As the company grows, we want to ensure that we conduct our business in a way that is ethical and this means taking account of our social, economic and environmental impact, and in consideration of human rights.

"Respack must ensure that our business development and growth is sustained in the social dimension which will support us to fulfill our responsibilities as good citizens, working with employees, their families, the local community and society at large," says Managing Director Mr CK Wan.

Among the activities of which Respack has held for the 1st half of the year include visits to orphanages and retirement homes, blood donation drives in collaboration with government hospitals and donations to the National Cancer Society.

In the midst of our busy schedules, we tend to take the small things in life for granted.

There's a beautiful saying- "we are so busy growing up that we forget that our parents are growing old". One of the ultimate things to be thankful for is having your parents around. Love them for the sheer fact they have devoted their prime lives for us unconditionally.

Love is the best gift of all

• Blood donation drives
